HYPER  
ORBIT

MADE IN ITALY

# HYPER ORBIT DISC

**Volume**  
0,45 m<sup>3</sup>

**Size**  
120x60x62 cm

**Weight**  
69 Kg

## HYPER ORBIT

HYPER ORBIT is the new rotary-orbital single-brush that makes working on all surfaces easy and fast. Suitable for treatments such as • polishing, • dewaxing, • shining, • micro-sanding on marble, cement, stone, parquet, terracotta and stoneware, Hyper Orbit is also ideal for cleaning delicate surfaces such as carpets and rugs. The oscillating head adapts to all surfaces and allows you to work easily even on uneven floors, minimizing the workers effort. A complete range of accessories available makes it effective in every situation. Taking advantage of the roto-orbital principle with high frequency oscillations Hyper Orbit is surprising for its excellent stability and manoeuvrability, even the crystallisation operations with steel wool will be quick, easy and effortless. The quick release system of the head and the compact chassis make it a machine that is easy to transport but robust and durable.

- ✓ **Economical:** The roto-orbital system reduces the consumption of electricity and chemical products.
- ✓ **Speed:** The rotation of the disc combined with the rotary-orbital movement reduces cleaning, sanding and polishing times.
- ✓ **Water consumption:** A considerable saving of water compared to traditional monobrushes.
- ✓ **Easy to use and intuitive:** It offers excellent performance, maintaining ease of maneuver, also suitable for operators who are not experienced or lacking in particular physical strength.

### TECHNICAL DATA

Model	Motor Watt max	Volt	Hertz	Disk Speed rpm	Work Diameter mm	Water tank	Size LxAxP cm	Weight Kg
HYPER ORBIT 1500	1500	230	50/60	1400	430	18 lt	70x43x128	40
HYPER ORBIT 3000	3000	230	50	1400	430	18 lt	70x43x128	52

Lever to regulate the inclination of the handle.

Closed handles to protect the operators hands.

Robust stem, resistant to acids for a long durations.

Water tank in ABS with 18 litres. Removable with anti shock and anti acid.

Painted and treated to resist corrosion from chemical agents for a long duration.

Rubber wheels of  $\varnothing$  25cm, anti - trail, abrasion resistants and loads, for a facilitated transport.

Hyper Orbit can be divided into two parts in a short amount of time to facilitate transport.

Velcro disks  $\varnothing$ 430mm

Hyper Orbit combines two mechanical movements: orbital and rotational. This technology allows a quick and effortless cleaning, in fact the roto-orbital movement produces micro-vortices that forces dirt upwards allowing the pad to capture it without having to use vacuum cleaners or chemicals. Even in the most difficult operations such as shining, dewaxing and micro-sanding, the roto-orbital movement makes the work easy and not tiring. The roto-orbital movement of the Hyper Orbit disk considerably reduces the friction of the disk with the surface without any loss of effectiveness and with reduced current absorption.
